# GOVERNMENT OF MEXICO DOWN TO LAST DOLLAR.

**Officials Wonder Where Next Day's Cash is Coming From.**

(BY A. P. NIGHT WIRE.)

**N**EW YORK, Aug. 12.—Conditions in Mexico make it problematical where the next day's cash to run the government is to come from, according to a statement issued here today by Horace Morris, former chamberlain of New York City, just returned from Mexico, where he has been serving as financial and administrative adviser to the government, reorganizing the country's financial system.

The military and naval contingents of the country are making the treasury officials wonder if the next day's cash is to come from "him," he said. "For 1917-1918, military expenditure alone is estimated at \$1,000,000,000. The total expenditure of the government for 1917-18, the year of Madrazo's accession, was \$10,000,000 pesos."

"Oil and mining enterprises and the Mexican people—long-suffering, now that they know what they are—are producing a larger revenue for the government than it has ever had before, but there will still be a substantial deficit. Consequently, the President is forced to borrow \$10,000,000, but it is not specified how or where."

**STUPENDOUS PROBLEM.**

Mexico has a stupendous governmental problem, he said. "But comparatively few persons able to do the work of the government."

For the time being, Mexicans are still lamenting the loss of former opportunities and possessions, he said, and are "devoting little or no effort to the betterment of present conditions."

"We need help," he continued. "Our salvation will come from within. The government must be placed upon a basis of honesty and integrity. Mr. Carranza appears to be doing well in supervising the work of reconstruction that we have under way in the department of finance. No quick remedy can be found for Mexican ill, although there are a lot of people who have come to offer."

The country has not reverted to barbarism. Men are again working in the fields; cities are becoming more attractive; men are again traveling through miles and miles of country you see no evidence of revolution at all."

"The country has gone through a bad time, but there have been positive factors."

**HENDERSON ASKS PUBLIC TO SUSPEND JUDGMENT.**

(BY ATLANTIC CABLE AND A. P.)

**L**ONDON, Aug. 12.—Mr. Arthur Henderson yesterday afternoon gave out the following statement:

"In connection with the labor party conference, what are obviously inspired statements appear in the press of today containing reflections upon himself without being supported by evidence. He deplores the possibility of his attitude at the conference having made the subject of public recrimination or controversy. He can only request the public to suspend judgment until they know the facts."

"Any statement of his position is to be made at this juncture if it will be made in the proper place, namely, the House of Commons, and given the opportunity which is now offered in so far as it will affect the actions interested in the successful prosecution of the war."

"The above also applies to a communication from Mr. Henderson, who received from the Prime Minister, with an intimation that it is being sent to the press."

An unsigned communication issued through the Press Association yesterday, which is reproduced below, is that referred to by Mr. Henderson:

"In the view of all of Mr. Henderson's colleagues, notably his labor party colleagues in the ministry, there could be no other outcome than his resignation. It has become impossible for him and them to sit at the same table, so wide is the difference between them and as to assuming his attitude in the view of his colleagues."

**HISTORY OF THE MATTER.**

"The history of the matter from the point of view of the government is as follows:

"Directly after the future aroused by Mr. Henderson's visit to India in connection with Mr. Garfield, the British government wished to state emphatically its attitude toward the Stockholm conference, and to put its case. The Foreign Office, however, left open the question whether it had endeavored to direct the delegates in the same direction as the views of his colleagues. If the government had any shadow of doubt about this, Mr. Henderson was asked to inform the delegates what its view was or if the Cabinet had doubted for a moment its intention to communicate Premier Kerensky's message. It would be difficult to make to see that the delegates were not left in ignorance of the true position."

The ministerial colleagues of Mr. Henderson take the view that the decision was made by the British government to insist that the ministry should be represented by him under the circumstances, and that his resignation was the result of his own desire to leave the ministry.

"The British government, however, was of the opinion that his resignation was unthinkable and his colleagues see in his resignation his own clear recognition of that fact. They are also of the opinion that the British government would have been compelled to make allowances for all the worry and anxiety in which the difficult situation involved him."

**Change of Heart.**

**GERMAN PACIFISTS NOW FOR HINDENBURG PEACE,**

(BY ATLANTIC CABLE AND A. P.)

**C**OPENHAGEN, Aug. 12.—The Catholic Centrist party in the Reichstag, which through the party's organ, Germania, announced it was satisfied with the Cabinet arrangements of Dr. George Michaelis, the Imperial Chancellor, and desired no further connection with the monetary government, is suspected by the progressive newspapers of having lost much of its interest in the peace reception.

The Pan-German newspapers openly boast that a considerable part of the Reichstag Centrists have now adopted a change of heart under the influence of the German Emperor in the East, and are now in favor of the so-called Hindenburg

# King of Siam and His Fleet; Kaiser's Latest Foe.

## Take Wheat.

(Continued from First Page.)

In our warehouse system over a considerable period.

"(4.) There are large stocks of wheat which cannot be drawn upon by the Allies during the war, but in the event of peace or defeat of the Germans, this would be available and might seriously demoralize the demand for American wheat."

"It must be clearly understood that the guaranteed minimum price of 15 cents per bushel has not yet got in the food bill, does not apply to the 1917 harvest, and then under conditions of which might be elaborated. There is therefore no determined price for the 1917 harvest."

"The result of this situation is that the normal price-making mechanism of the market has been thrown into disorder and the government must take steps to stabilize the price of wheat, but stabilized price of flour and that it should enable us to arrive at a stabilized price of bread."

## AID OF MILLERS.

"The food administration has had the patriotic co-operation of the leading millers of the country and these men have organized, at the suggestion of the government, a committee to represent the entire trade. Detailed proposals for an agreed differential of profit per barrel of flour and per ton of food are under consideration."

"Under this arrangement the public will be assured an equitable and stabilized price of flour based upon the cost of raw material and we consequently expect the voluntary arrangement with the mills will give satisfaction to the public."

"The universal endeavor over the country to reduce consumption of flour and to bring the price down into a reasonable government price is brought into play, either (a) the American producer may face a slump in wheat possibly because his production costs are too high or (b) the export price of wheat which ultimately determines the real price, is at the will of a single agency."

"It must be clearly understood that the guaranteed minimum price of 15 cents per bushel has not yet got in the food bill, does not apply to the 1917 harvest, and then under conditions of which might be elaborated. There is therefore no determined price for the 1917 harvest."

# DEMIT FRANCE ENACE BELGIUM.

General Staff Says, on  
Begun Concentration of Her  
frontier and Changed the Plans  
in Invasion of Kingdom.

## TO CABLE AND A.P.

Lovinghoven declares that the Germans retreated from the frontier because they were too weak to pass through the French line; but he argues that, although final success was not obtained, Germany, by seizing the opportunity of making advances through Belgium, avoided war on her own territory.

The newspaper says that the article of Gen. Von Fritsch-Lovinghoven is Germany's leading military historian and writes on the basis of the official General records, is circulated simultaneously in the German press.

## ANXIOUS TO HONOR AMERICAN TROOPS.

(BY ATLANTIC CABLE AND A.P.) PARIS, Aug. 12.—Jallian, leader of Arsis, visited American Ambassadors Sharp last Thursday to request permission that he be allowed to present a banner to a battery of the American expeditionary forces as an expression of the kindly sentiments of the people of his district for the United States. The leader pointed out that the people of the Arsis region, in which his district is situated, contributed in no small way to the freedom of the United States by fitting out a company for the Lafayette expedition in Revolutionary War times.

## SEEK MORE FUNDS.

Senate for raising additional amount by a bond issue of indebtedness and taxation is strong in both

Administration officials have not yet agreed on the amount of additional tax to be imposed for the year.

## FROM THE STATEMENT.

"The favorite formula," reads the statement, "which is used to justify the proposed sending of our conscripted soldiers to the battlefields of Europe is that we are to liberate the German government that the iron heel of Prussian militarism may be removed from the necks of the German people."

"We have been a孟子的人民 to come over and help them, so far as we know, but we were interested just the same in learning what are the facts to the German domination and in what way the undue influence in the next few months."

SENATOR GORE.

"The Senate having considered the opening statement of the Republicans, it is the general opinion of the House revenue bill will be introduced in the Senate tomorrow. Optimum hope to be embodied in the bill is to wait until if is at least a month, many of our members will be surprised.

La Follette will offer, early next week, his substitute for the bill, which would remove the entire burden of taxation on profits, incomes, liquor, tobacco, Senator Gore is ex-

pected to speak in support of the new statement.

SENATOR KELLY.

"The Senate having considered the opening statement of the Republicans, it is the general opinion of the House revenue bill will be introduced in the Senate tomorrow. Optimum hope to be embodied in the bill is to wait until if is at least a month, many of our members will be surprised.

La Follette will offer, early next week, his substitute for the bill, which would remove the entire burden of taxation on profits, incomes, liquor, tobacco, Senator Gore is ex-

pected to speak in support of the new statement.

THE SUGGESTION.

"When we start out to change governments for our benighted brethren elsewhere, without their consent or co-operation and in the face of their almost certain opposition, we can hardly expect that their system or their 'house-keeping' term it."

From the viewpoint of the first article which opens the discussion it appears that there is nothing wrong with the government and criticism of the German government here in the United States is justified.

Mr. Ranch holds that Germany has "universal suffrage," while the Parliament of Great Britain is not based on such suffrage and that "it is a gross exaggeration to call Prussia an autocracy, as now has become common."

## FREIGHTER SINKS SUBMARINE.

(BY A.P. NIGHT WIRE) PORTLAND, Aug. 12.—A British submarine has been sunk by the guns of a merchant freighter which arrived here today under the assumption that which were fired, struck the bottom. The British submarine had been driven from this port.

Lynch denounced the demonstration and third the submarine went to the bottom. The British submarine had been driven from this port.

MISSOURI STRIKERS  
PRAISED BY POLICE.

(BY A.P. NIGHT WIRE) KANSAS CITY (Mo.) Aug. 12.—Deportation of 400 workers, accomplished in orderly fashion early today, by sympathizers of striking miners, was condemned under the supervision of the police, left the transportation of the two Kansas Cities still tied up, while conference committees endeavored to find a solution for the situation. Major George E. Davis of Kansas City, announced that an amicable settlement was in sight. The men demand recognition of the union and reinstatement of discharged employees. About 1,000 miners under contract in connection with the actual deportations, were over a hundred men said to have been an I.W.W. administrator to a soldier. In their raid on I.W.W. headquarters damage of \$1000 was done.

POLITICAL OFFICERS  
FOR RUSSIAN ARMY.

(BY PACIFIC CABLE AND A.P.) PETROGRAD, Aug. 12.—M. Savinkoff, Assistant Minister of War, yesterday announced that the government had decided, in connection with the re-establishment of iron discipline in the army, to appoint permanent commissioners to supersede the troops to replace the present commissioners who were selected.

The new commissioners will exercise their authority in the domain of self-government of the army and to control its political life, but the officers in high command will retain their exclusive power in field operations. As a check on the selection of commissioners, the permanent commissioners will review all such sentences. M. Savinkoff also announced that it was the government's intention to fill the lists of the high command with young officers.

Follett Peace Discussion  
Staged for Hearing.

(BY A.P. NIGHT WIRE)

WASHINGTON, Aug. 12.—Dispatches from Athens to the Greek Legation say the Deputies of upper Epirus have sent to the Chamber of Deputies a memorandum affirming that the Hellenes are the true patriots and its attachment to the mother country, and asking to be admitted to sit in the chamber.

In his response Premier Venizelos said that the Hellenes were the friends of the inhabitants but that as Greece was at this time deprived of an international title to Upper Epirus, now occupied by Italy, the government could not admit the Deputies without creating international difficulties.

(BY A.P. NIGHT WIRE)

WASHINGTON, Aug. 12.—While the Senate continues debate on the proposed war bill, this afternoon the House will be taken on the floor of the capital toward voting part of the additional money needed to carry on the war until July 1, 1918.

Two ready money, possibly \$10,000,000 or \$2,000,000, will be voted to meet current expenses before Congress can adjourn at the next session, so says McAdoo, who has arranged a conference with Democratic leaders of the House and Senate Committees, for the week to discuss the

status of the Ways and Means Committee, both Democratic and Republican, have agreed to delay legislation on reasonable amounts until the end of the war.

GOVERNMENT IS ALL RIGHT, IN  
ITS OPINION.

Los Angeles, Cal.

## FINANCIAL ADVANTAGES OF ANNEXATION SHOWN.

Saving that Would Accrue to the People of Santa Monica by Incorporation into the City of Los Angeles is Greater than Last Year's Tax Bill—Figures are Herewith Presented.

BY J. C. STEELE.

THE combined city and county tax rate of Santa Monica, based on a county valuation, amounts to \$3.39 on each one dollar's valuation, and that of Los Angeles on the same basis, both city and county, amounts to \$2.82, or a difference in favor of Los Angeles of 47 cents, which would mean \$4.70 on each \$1000 valuation in favor of Los Angeles. The county valuation of \$2,000,000 for last year was \$11,980,612. Figures 47 cents on the county valuation, you will find that it cost the taxpayers of Santa Monica to stay out of Los Angeles \$1,563,358, or \$4.70 per capita. Will it not pay to annex?

### INSURANCE.

The reports of the Santa Monica water companies to the Railroad Commission show the income from sales of water to be \$90,000. The water rates are as follows: Income was 15 cents per 100 cubic feet, or the rate we are now paying. The rate charged the consumers of Los Angeles is 5 cents per 100 cubic feet, or a difference in favor of Los Angeles of 8 cents per 100 cubic feet. Annexation will mean a saving to the Santa Monica consumers of \$13,260, a saving of \$1.65 to each man, woman and child in Santa Monica. Will it not pay to annex?

### WATER.

The reports of the Santa Monica water companies to the Railroad Commission show the income from sales of water to be \$90,000.

The water rates are as follows:

Income was 15 cents per 100 cubic feet, or the rate we are now paying.

The rate charged the consumers of Los Angeles is 5 cents per 100 cubic feet, or a difference in favor of Los Angeles of 8 cents per 100 cubic feet. Annexation will mean a saving to the Santa Monica consumers of \$13,260, a saving of \$1.65 to each man, woman and child in Santa Monica. Will it not pay to annex?

### TOTAL SAVING.

Saving in water, \$64,358.28; saving in water, \$53,285.28; saving on light, \$55,996.78; saving on gas, \$15,616.81; saving on insurance, \$15,606. The grand total of all this saving is \$214,951.45, or a saving to each man, woman and child in Santa Monica of \$17.89 each year. The total amount of taxes raised in the new order of things would be \$26,000. Deduct this amount from the savings made by annexation, and you will find that you have not only paid all your taxes out of the savings on water, gas, insurance and taxes, but you will still have still saved the sum of \$188,451. Taxpayers and consumers, you can afford to pay the enormous price for the privilege of having a home away from home? Can you afford to stay out of Los Angeles? Will it not pay to annex?

No one is able to estimate the amount of time and money required to continue indefinitely the discharge of raw sewage in the midst of bathers. No one can measure the ultimate cost it will be to the citizens in the future to the property owners in this community. Annexation offers us the only logical solution to free our beach of sewage contamination. The incorporation of Santa Monica into the city of Los Angeles will mean the substantial saving of \$65,000.76, or the substantial saving to each man, woman and child of \$6.35. Will it not pay to annex?

### GAS.

According to the report filed with the Railroad Commission, the annual income from the sales of gas to the consumers of Santa Monica amounted to the sum of \$99,177. The cost of gas to the consumers of Santa Monica is 7 cents per kilowatt. Is there not a difference in favor of Los Angeles of 2 cents per kilowatt? Annexation will mean to the consumers of Santa Monica the enormous saving of \$65,000.76, or the substantial saving to each man, woman and child of \$6.35. Will it not pay to annex?

### GOVERNMENT CHARTERS SHIPS TO BRING LUMBER.

One feature of the new order of things is the retention at home of most all of about \$2,000,000 a year that formerly went to Europe by way of timber. This lumber is now being shipped to the continent by the railroads.

The city of Glendale expects to spend \$186,652.34 during this fiscal year. One feature of increase has been chartered by the government to rush redwood lumber from the forests of Mendocino county to Camp Kearny, the National Guard cantonment near the village.

The live stock sanitary board has warned cattle men that unknown diseases are prevalent among cattle that have died of starvation.

Ranges are very bad on the lines, though towns and rain have been received.

The First Arizona Infantry has been sent to the camp to assist in the

drilling of spur tracks which have been built by the Santa Fe.

An advance guard of the thousand soldiers who will construct

a road from Glendale to the

camp today by the Santa Fe. The carloads are being distributed at various points in the great camp site from spur tracks which have been built by the Santa Fe.

It was agreed that members of several Lodges in the state would not stand by him if he was accused of being a traitor.

At the camp the soldiers are to be housed in tents, and the men will be fed at mess halls.

FOR THE DAY.**

**May Form Constabularies  
Supplant Militia.**

**Executives of Six States Dis-  
cuss Problems.**

**Methods of Handling I.W.W.  
are Agreed Upon.**

**INT'L. P. NIGHT WIRE.**

**PORTRLAND (Ore.)** Aug. 18.—In-

formal conferences were held today by Gov. Boyle of Nevada, Rep. of the U.S. House, and Rep. of the State of Oregon, and Senator of Washington on a con-

cern which a programme of action in war times, State policy and local problems was mapped out between Whitecombs of Oregon and Alexander of Idaho left the city late yesterday night.

Much of today was spent in final negotiations of Gov. Boyle's handling of its recent I.W.W. trouble and to considering steps that constabularies similar to that in Nevada, Gov. Boyle offered to the other Governors an organization outline.

It was made apparent that the executives do not want to start shooting guns over the heads of the people, but everything was mapped out a course of action to be followed immediately in case of disturbance.

The problem of inducing volunteers to serve in the new national army under the slogan "not voluntarily and thus fit to be ought to their adopted country" has been met with some success, except for a pinch, in the last few days.

Gov. Boyle of Nevada, who recovered from a slight attack of appendicitis, took time off to help his men and Gov. Hammerly of Idaho, who left at 7:15 for their respective homes.

**PLAN CONSTABULARIES.**

State constabularies to replace the National Guard, now in the Pacific Northwest, were favored and proposed yesterday by the Governor of the six Northwestern States, and a representative of California, at conference here to discuss means of meeting the external situation, preventing revolution and solving problems presented by the war.

It was agreed that special committees of several Legislatures would be sent out, but they will not be called until the fall.

At the session last night was the Governor of Montana, Utah, Oregon, Washington, Idaho and Nevada, J. L. Lakin, president of the California Immigration and Naturalization Commission, who came last night to represent the Governor of that State. The committee was told that there was a part of the state that was good and he started out in the first place, and it fact, the First Division fact, except California, and including Wyoming.

Because of the Western movement, however, in the state, when Kitty Koerner, his favorite daughter, was in the state, he had to leave the house without warning, except in the morning, except for a pinch, in the eighth. Only

the second game of the day was the Tigers able to get the plate.

**GOING GONE.**

THE CITY  
AND ENVIRONS.

For Aid of Storm Victims.

The Ladies Auxiliary of Division No. 1, Ancient Order of Hibernians, will hold a benefit entertainment this evening in Lincoln Hall, Walker Theater Building. The proceeds will be sent to aid members of the order who suffered severe losses in the storm, which occurred recently at New Albany, Ind. The programme will include Irish airs, vocal and instrumental solos, readings, etc.

The second hearing by the State Insurance Commission of the case of the Civic Center Development Association, Civic Center Association, cities of Pasadena, Alhambra, San Gabriel and others against the local railroad in the matter of grade crossings, has been set by the commission for the second inst., it was announced yesterday.

To Open Office Here.

For the benefit of the educational interests of Southern California, and for the convenience of teachers south of the Tehachapi, the State Board of Education has arranged for regular office hours at the State office in the Union League Building, Los Angeles Room No. 417, occupied by the state board, which will open to receive visitors on Wednesdays from 3 to 6 p.m. and every Saturday from 1 to 12 m., and from 1 to 5 p.m.

Will Talk to Tailors.

Frederick T. Croonborg, of New York and Chicago, general director of the Universal Tailoring Society, and member of the National Stamp and Wool Bureau of America, is to visit Los Angeles Saturday, with the view of uniting the various phases of the tailoring industry. Arrangements have been made for a meeting of leading members of the various branches of the tailoring industry in this city, at which time Mr. Croonborg will talk on tailoring problems and unite all for a general good. He will also exhibit the famous salutary bazaar, which has the reputation of giving every man a military bearing.

END OF TRAIL.

Girls Dressed in Male Attire are Taken in Charge.

The Lawless sisters, Alexandra and Gloria, who last Saturday arrived in San Pedro dressed in men's clothes, and on their way to "somewhere," adventure-bound, yesterday reached the end of their "romantic trail." Alexandra, who is the youngest, was shipped back to Stockton to face the parental ire, while her sister, unfortunate in being over age, was transferred to the City Jail. The girls left Stockton via the highway route, three weeks ago, and sought the thrills of travel astride oil tank cars and inside empty box cars. When arrested, they gave the names of Ron, the following teletype communication with the Stockton authorities, their true names became known.

Yesterday the girls' father wired the police to San Pedro, and was placed on a train by Policewoman Brigham and sent home, but Gloria now faces a sojourn in the City Jail, as charges of vagrancy and masquerading in masculine attire may be filed against her by the police.

High Flier.

A VIATOR EXCEEDS  
ALTITUDE RECORD.NOTABLE PERFORMANCE MADE  
AT SEAL BEACH.

Unfortunately the officials of the Aero Club of Southern California are not on ground when He Descends, so Achievement is not Duly Recognized.

(Local Correspondence.)

SEAL BEACH, Aug. 12.—Before a crowd estimated at 25,000 people, C. G. Prest, the aviator, broke the altitude record today, mounting to a height of 18,100 feet. The record is not official, owing to the fact that his instrument was not inspected after his descent by representatives of the Aero Club of Southern California, although it was inspected prior to the ascent. The ascent was made shortly before 4 o'clock, but it was more than two hours later when the aviator safely descended to earth and no representatives of the Aero Club of Southern California was present at that time.

Prest, in beginning his ascent, took Wayne Abbott, the parachutist, along, up with him to 10,000 feet, and made two preceding parachute jumps. Abbott then made a beautiful drop and safe descent, while Prest continued on up for the altitude record.

At 14,000 feet Prest had to feed oxygen to his engine, and at 15,000 feet he put on an oxygen mask. The cold was intense. The night was successful in every respect, except for the lack of official representation at the close.

YELLOWTAIL AT AVALON.

Ten-finned stolid yellowtail were the highlights enjoyed by those at Avalon, Friday, when five of the first-named fish were reported. Two tups, weighing 55 and 57 pounds were gaffed. Nearly all alborecs and rock bass were caught.

Clever.  
WIRELESS CONCEALED.

Mysteriously Operated Apparatus is Found by Federal Agent in Home of Youth—Entirely Invisible from the House Front.

What the police and Federal authorities believe is a fully equipped and a powerful wireless station cleverly concealed, was discovered by Federal Agent Fred C. Boden Saturday night in the home of Charles Austin, 16 years old, at No. 1304 Bates street.

It is believed to be entirely invisible from the outside, and only partly exposed even from the inside of the room, an aerial said to have been attached to a powerful sending apparatus, which is hidden in the ceiling of the room. The usual type of aerial, previously built high above the roof of the house, had been removed, the investigating officers said, but the whereabouts of the station, due to the unique arrangement, remained unimpaired.

Austin's mother said her son used the apparatus for amusement only during the day, but that when the law was compiled with by the removal of the old style aerials. The boy was ordered to appear before the Federal agents this afternoon.

As It Happens.

## BANDITS AT LARGE.

Police Fail to Find Two Men, Operating at Least Part of Time with an Automobile, Who Committed Three Robberies.

Women are Victims.

Diligent search yesterday by the police failed to locate two men, who committed three robberies Saturday night. The first occurred at Eighth and Francisco, but the women who were victimized it became impossible and left the telephone before imparting full information. She declared two men were operating in a light-colored automobile and that they had taken \$200 in small bills and dollars' worth of diamonds.

While the detectives were searching the vicinity, the same two men held up and robbed Harry R. Fuller of No. 2244 Belmont, as he crossed the corners of Second Avenue and West Adams street, taking a gold watch and a knife.

At Thirty-seventh and Dalton, another robbery was committed by F. W. Perry, who lives at No. 4109 Brighton avenue, and Miss Helen Fry of No. 3728 Dalton avenue, found themselves looking into the mouth of a revolver and were told to throw up their hands while the bandit "covered" them, with the gun, the second one relieved Mr. Perry of \$24 and took a watch and two rings from the young woman.

## RAFT BOARD HEADS TO CONFER AT SACRAMENTO

District Chairmen to Fix Exemption Policies; No Meeting Here.

**HONOR STEPHENS** has called a conference of all the draft boards of appeal in the state to meet at Sacramento on Aug. 15 to fix the rules in regard to exemptions from service in the Lib-  
erty Army. The conference will be held at the Hotel St. Francis, Sacramento, at 3 o'clock p.m. Col. W. H. Hollingshead, chairman of the District Board of Appeals, who called the meeting, will leave for Sacramento on Wednesday night.

**HOLABIRD'S VIEW.**  
"I shall not hesitate to bring into the conference the condition which exists in Los Angeles at present, if I am given an opportunity," said Charles Holabird, yesterday. "If statements which have been made here are true, the government should appeal all claims for exemption to the District Boards of Appeals."

LIREWINE.

Have you noticed there are mighty few summer conventions, by reason of the military necessities of the hour? Oh, well, some of 'em could be spared. And so could Billy Sunday!

THREE DESCENDANTS.

Thirty-nine Iowa counties were represented at the Iowa picnic at Long Beach. The three wise men of the east must have been the fathers of a numerous progeny. Witness their hegira to the growing, glowing West.

A BOUT ALIKE.

The munition-makers who are scaling down their excess profits in the reports to the government are very human about it all. They hope to escape the additional tax proposed under the pending bill. What a lot of the old Adam there is in us all!

WE GUESS YES.

Senator Jones of Washington says all of the metropolitan newspapers are owned or controlled by the liquor interests. This is the same Jones who recently announced that the newspapers were all owned or controlled by the manufacturers of arms and ammunition. Is it possible that Jones is mistaken again?

LOOKING FORWARD.

The Red Cross in New York has already begun to plan a merry Christmas for the American soldiers in France. With Christmas five months away, Kris Kringle should have plenty of time to collect enough presents to fill all the socks of America's defenders across the sea, and the Red Cross evidently intends to see to it that Kris does not neglect a single Sammy.

WHAT IS IT?

Mystical people are seeing all kinds of portentous signs along the eastern shore. Off Bar Harbor, Portland, Block Island, Cape Hatteras and elsewhere they have been seen prowling around. The latest was later discovered to be a pole in the mud indicating the location of a valuable Chesapeake Bay oyster plantation. But it was enough to scare the people in Baltimore almost to the staves of a confection at whatever that may be.

CLEAR ENOUGH.

Congress will be asked to take steps to quell the I.W.W. rioters in the United States. Congress should not have to be asked to take such a step. It would seem that the duty of the government is clear enough. Treasonable acts and utterances should be nipped in the bud, whether discovered in the realms of high finance or in any other field of business or labor. There are only two classes in America today, those who are for the government and those who are against it.

CRITICISM.

Your severest critic may be of more worth to you than your most flattering friend if you are big enough to be willing to profit by his criticisms. No matter about his motives in pointing out your faults and mistakes. You have no business to bother yourself about his motives. It is his message that most vitally concerns you. "His speech and actions are his own and the motives that tempt him are his own—let him look to all that." However, what he has to teach you belongs to you. Listen to his advice, apply it to your life and you will increase your strength and wisdom, regardless of the effect his apparent bitterness may have upon him.

DONS HE ESCAPE?

A Riverside man committed suicide an hour after the examining physicians had pronounced him fit for military service. While his body was sound and strong the young man's mind had doubtless become unbalanced because of his submission to impressions of what he considered the evil of being forced into the army against his will. The motives of the dead may not be guessed too closely, but the tragedy should prove a warning to those who are allowing themselves to become morbid over the draft. It is better to live for one's country and for humanity than to attempt to escape the responsibilities of life by voluntarily quitting the field of present action.

ND HIS WORKS.

The slackers and pro-Germans and stay-at-homes and friends of Satan and his Works have organized a Pacifist party under the title of the People's Council of America, the purposes of which have been discussed in The Times. About every residence in Los Angeles and presumably in every city in the United States was affixed on Friday last with a six-page pamphlet advocating a cowardly and disreputable peace in the German interest. How many hundreds of thousands of dollars was expended by Mr. Hohenholz in this effort to build up this slackers' syndicate will probably never be known. The pamphlet referred to concludes as follows:

I endorse the aims and objects of the People's Council of America for Democracy and Peace. Please enroll me as a member.

Name .....

Address .....

An Irish-American instead of signing this "enrollment blank" endorsed on it the following:

"I'm for the American side.  
The proud bird of freedom all hail!  
The bird that no tongue can invigil  
Or put salt on his beautiful tail."

GERMAN GOLD—DIRTY WORK.

G While the air was still thick with rumors and alarms of the possible perils ahead of this country as a result of its entry into the great war, The Times asked and answered a few pertinent questions for the benefit of the people of Southern California. Was Los Angeles in danger from a German or Mexican or Japanese attack either by land or by sea? To this the answer was an unequivocal "no." Was Los Angeles in danger from spies within? "Yes."

Subsequent events have proved that in all cases the answers were correct. They were correct not only for Los Angeles, but for the whole of the United States.

Germany's sole hope of staving off certain defeat ahead of her if the full power of the United States were once mobilized and added to the forces of the Entente Allies was to speedily stir up industrial and social and partisan strife within our own borders. In fact, the Prussian military machine started to work along these lines as soon as it found out that the American government refused to O.K. the legal status of Germany's highest pirates.

To divide America against itself the German government will spare neither gold nor the employment of any influence that the use of gold can bring to bear for this purpose. And the Kaiser's gold chest is as yet a long way from touching bottom. Moreover, he has many agents scattered throughout the United States, men of brains and action, who know how to employ this gold to hamper and embarrass in every conceivable manner those carrying out the country's many difficult war measures.

That the Kaiser's gold is so working we have evidence in the labor strikes, race riots and I.W.W. activities which in the last two months have increased with such alarming rapidity.

The greater part of these strikes has occurred in the copper-producing districts or the coal regions; the bulk of the industrial agitation has been directed against the oil producers of America. In no case have the strikers put forward any legitimate grievances; in many instances they have been taken care of and provided for, not by the funds of any labor union, but with gold whose source has not yet been definitely determined. We know, at least, that in Arizona a large gang of Mexican miners were encouraged to refuse work in this manner; these and their families were kept in food and idleness by the "charity" of a big wholesale grocery establishment with a German name.

These facts are significant, for copper and oil are two of the prime war necessities. But no less significant is the great burst of revolutionary activity among the loafers and firebrands joined under the paradoxical title of Industrial Workers of the World.

An anarchy has been fostered in Russia, so it is being financed in our own land by the military despotism of Central Europe, determined to dominate or to disintegrate the civilized world. Prussia's proposals were by strikes to cut off from the United States its supply of copper and oil and to marshal the anarchistic forces of the I.W.W. against our crops and foodstuffs. This plunder band, composed mostly of Negro workers and entirely of non-severs, has heretofore never possessed the funds for any concerted campaign. They have been merely sporadic idlers and thieves. But lately it appears among their numbers a concert of action only possible under some better form of organization—and this latter organization means that a new source of money has been discovered.

There is gold behind the increasing daring and more open defiance of these wolves of society. These creatures, hired to set fire to grain fields, to burn forest timber and to blow up warehouses stored with food have grown treacherous and never satisfied longings, aspire to it from afar.

It would be impossible within the limits of a single article to recount the events, the deeds, the persons of this century and a third of republican liberty. That is the office of the historian, the philosopher and the poet. It is enough for us to take count of our principles and reaffirm them in the profound conviction of our sons, and give our wealth to preserve them and our sons to fight and, if need be, die for them.

The truth of the equality of man announced by the founders of our republic was no contrivance of extraneous device; it was no rule for the exigency of the moment. It is in the eternal nature of truth and things and man and God. It is as old as the heavens and as new as today, and it possesses that immortality that belongs to essential truth.

We sacrificed and fought today to maintain the doctrine of democracy that all men are free! And we mean by it that fundamental fact of human nature by virtue of which man is man, endowed by heaven with the power to choose between good and evil, and to direct his course towards those ends that seem to him best. We mean that the office of government is to protect that freedom and not to encroach upon it; to throw around it the environment of law, that under law it may be safe.

Human society on this continent has been developed under the power of the principles of democracy. A continent has been subdued to culture. A degree of external human comfort has been attained and enjoyed that has not been surpassed in any portion of the earth or on any period of history. The results of scientific research have been applied to the arts of life, and whatever pertains to man's conquest over the material world has been made as complete here as in any other country. The area of the country has been extended by peace and by war until its borders are lined by both oceans through twenty degrees of latitude and extend to Orient and Occident. Our country presents a theater of world-grandeur for the display of free constitutional government.

THE THERE IS STILL HOPE.

Citizens who have about given up hoping to see the Second-street tunnel anywhere except on paper should take heart of grace. There is still a chance of it being built before the millennium comes. The City Council has started new proceedings for the work and kindly promises to hasten these as much as possible. For which favor much thanks.

One must confess, however, that the constant succession of delays in connection with this important project is not calculated to give one any great faith in the ability of the Council to actually get the tunnel started.

The affair of the government have been administered by those whom the people have chosen. Universal suffrage makes revolution unnecessary by giving every man the right to appeal to the ballot as the final remedy of all public wrong. We have never had under this plan a wicked or absolute President or a corrupt or mercenary Supreme Judge. We have entrusted religion to the religious sentiments of human nature without the interference or support of the state, and established a system of education for all in making the public school free and in making it secular. We have never required a standing army or anything more than a local constabulary and militia to enforce order upon the people. The government is steady because its base is broad—soothing to the freedom and equal rights of every man—and that in the last run the laws which the people make themselves they will respect.

We are today in population, in wealth, in power and in prosperity the foremost nation of the earth. We owe this to the people who make themselves they will respect.

Whoever thought we should ever see a time when there would be a shortage of the census? But we seem to be in the midst of such a condition.

We are today in population, in wealth, in power and in prosperity the foremost nation of the earth. We owe this to the people who make themselves they will respect.

We are today in population, in wealth, in power and in prosperity the foremost nation of the earth. We owe this to the people who make themselves they will respect.

**The News From South of Tehachapi's Top.****MAKES ATTEMPT TO ESCAPE FROM JAIL.**

BY DIRECT WIRE—EXCLUSIVE DISPATCH

EL CENTRO, Aug. 12.—Early

yesterday two Hindus, a negro and a white man, arrested for not registering, made an attempt to get out of the County Jail and were rapidly tearing loose bricks and mortar, and ready to dash for liberty, when discovered.

Sheriff Appelstein said it was almost impossible to get men to tame to work and that the condition of the jail was such that to dig out was so easy that the men made a try to escape.

The building is old, unsanitary, crowded and simply a shell, and only the constant vigilance of the officers prevent the prisoners from wrecking the place and making a wholesale escape.

At Rest.

**OLD RESIDENT OF CROWN CITY DIES.**

BY DIRECT WIRE—EXCLUSIVE DISPATCH

PARADENA, Aug. 12.—Mrs. Elizabeth M. Barrett, 73 years old, a native of Vermont and for twenty-one years a resident of the north side of Pasadena, died yesterday evening at the family home, No. 1269 Summit avenue. She was a member of the Washington Avenue Methodist Church and had a large number of friends.

Mrs. Barrett, who had been ill for several years, left with her father, the late W. T. Barrett, and her brother, the late W. G. Barrett, to California in 1905.

The father and sons of the original Indiana who owned large tracts of land, now Pasadena, during their time came to what is now San

## BRIGHT HOPES IN GOLDFIELD.

*Early Additions to List of Mines in Prospect.*

*Work on Idle Properties is to be Resumed.*

*Market Activity Dull During July and August.*

*Editorial Correspondence:*

**GOLDFIELD.** (Nev.) Aug. 11.—Supplements of highly profitable ore continue to go forward to the local smelters from a number of properties in the Goldfield district and prospects are increasingly bright for early additions to the list of producing mines here. The scope of operations will be increased in the near future by the beginning of active work on two or three properties that have remained in idleness for a long time and in territory that is regarded as having possibilities of important possibilities for the making of producing mines with comparatively little development.

Some of the local properties have been operating steadily of late, but at this time there are some of the miners, who are generally prosperous here, require a vacation, as do most residents of mining centers. As a rule, the season of quiet in mining districts, as well as of most pronounced strength in the mining shares market, is in the fall. People in the mining camps expect little of interest in mine development or in market activity during July and August, but look

forward with confidence to a general revival during the autumn months.

Mine developments of the past week in Goldfield have aroused no small amount of interest and in a few instances have had the effect of materially stimulating stock values.

Among the properties on which highly favorable results have been reported are the Great Bend, Jumbo Junior, Merger Mines, Reorganized Kawanas, Atlanta, Cracker Jack, Red Hill, Florence, Golden, Consolidated, Standard Silver, Pick and in a part of the Jumbo Extension property that is being worked under lease by the Consolidated Mine Company. Operations of the past week have revealed the fact that large numbers of the available are of commercial grade in the district.

Ore of high grade has been exposed in the progress of development work on the new property owned by the Consolidated company from the Jumbo Extension and embracing a strip along the western part of the Pal Verde claim, adjoining the big Columbia Mountain fault. The vein dips at an angle of 45 degrees and is said to have returned a satisfactory profit above operating costs. On this level, as well as on the main and intermediate levels as developed thus far, the 1400-foot level, development work is now under way and continues to add materially to the reserve of good flotation ore.

One of the most interesting and potentially important developments is in the new workings on the 250-foot level of the Cracker Jack property. The south drift, driven from the main east crosscut following the big Columbia Mountain fault, has been extended to 100 feet in a highly-mineralized zone containing ore of commercial grade and yielding many good assays over widths varying from four to twelve feet. The vein dips at an angle of good mill ore found at a corresponding point in the same vein on the 120-foot level, the new development is regarded as one of the greatest importance.

**RED HILL FLORENCE.**

Paying returns at two points in the new workings of the Red Hill Florence company and at three other places the new work has exposed small seams of quartz from which good assays have been obtained. The veins are being driven in the big Florence vein from this level and the No. 1 vein is now showing a wide seam of commercial ore that appears to be wider than the No. 2 vein. The work here is being carried forward ener-

getically, with the aid of excellent equipment.

### JUMBO EXTENSION.

Development work continues at several points in the local property and an effort will be made to pick up the extension in reserved territory of the main crosscut opened in the ground leased to the Consolidated Mine Company. At the Copper Mountain property development work continues in three shafts and rapid progress is being made in sinking to explore the ore-bearing zones that traverse the big property.

### JUMBO JUNIOR.

In a winze sunk from the north drift on the 250-foot level, in territory leased from the Reorganized Kawana Company, the Jumbo Junior has exposed one of high shipping grade, many of the assays running in excess of \$100 per ton, and this ore is being broken for shipment to the smelters. The vein is similar in character to the high-grade product found in the shaft contact zone in the adjoining Jumbo Extension. The width of the vein is about 10 feet, much of the border is lost and a road near the vein has also shown good ore.

### LONE STAR CONSOLIDATED.

Pipes are now being perfected for an early resumption of work on the Lone Star property and President A. C. Warden is expected to arrive here shortly from New York to complete arrangements for the beginning of work. Operations will be under the personal direction of Tom W. Kendall, one of the most experienced mine managers in the country. The company has levied an assessment of 2 cents a share, which will provide a liberal working fund.

### GREAT RED MINE.

Daily shipments continue to go to the sampler and several carloads of ore were shipped in July, yielding returns that make an encouraging picture for the month. Production came from the main stopes on the 140-foot level and four-foot faces of ore have been exposed that is most encouraging in appearance and affords good ground for the belief that deposits of shipping grade are near at hand. The veins are being driven in the big Florence vein from this level and the No. 1 vein is now showing a wide seam of commercial ore that appears to be wider than the No. 2 vein. The work here is being carried forward ener-

### SILVER PICK CONSOLIDATED.

In a highly favorable report, setting forth in detail the work performed and the condition of the company, has been sent to stockholders of the Grandma Consolidated, accompanying the call for stockholders' No. 2, the rate of 1 cent per share, due August 1st. The big shaft has reached a depth of over 450 feet and a change in the formation at this point is regarded as favorable to success.

### NEW DEHYDRATING PLANT.

(Local Correspondence)

**FULLERTON.** Aug. 5.—The American Oil Company has completed a petroleum rectifying electric dehydrating plant near here. It is now in operation. Cleaning oil by electricity has proved for the most successful method here. The local field now has at least a dozen electric oil cleaning plants and all of them are giving satisfactory results.

### GRANDMA CONSOLIDATED.

A highly favorable report, setting forth in detail the work performed and the condition of the company, has been sent to stockholders of the Grandma Consolidated, accompanying the call for stockholders' No. 2, the rate of 1 cent per share, due August 1st. The big shaft has reached a depth of over 450 feet and a change in the formation at this point is regarded as favorable to success.

### REGARDING PATENTS.

### MINERALS SEPARATION COMPANY CRITICIZED.

### (SPECIAL CORRESPONDENCE)

**WASHINGTON.** July 26.—To make possible the most efficient conduct of the war, the American Mining Congress urges that one of three steps be taken with regard to the patents of the Minerals Separation North American Corporation. The suggestion made by the Mining Congress, which are contained in the forthcoming letter to the Secretary of Defense, is that the government charge for the use of the process.

(2.) That Congress shall annual the rights granted by the patent.

By making the use of its flotation process public property, the owning corporation is responsible for a material reduction in the output of various metals essential to the effective prosecution of the war, according to the statement from the American Mining Congress. The way in which the company conducts the business is outlined in an advanced copy of the editorial:

"It absolutely refuses to deal with those companies which have been experimenting in the development of the many oil flotation processes. It is the company's desire to settle in full its demand for alleged patent infringements.

"It demands that its licensees shall give it the right to inspect their operations, to disapprove any changes which may be an improvement, modification, or addition, or may be useful in carrying out any of the processes or apparatus in its possession, and the right to patent for its own use any invention made by its licensee, and further requires its licensees to bind their employees to assign or transfer to the company any invention made by such employees."

"It requires its licensees to pay a royalty in each and every instance computed on the entire metal value recovered from the mineral materials treated by the licensee, provided any portion of such value has been recovered by flotation."

**HEAT CLAIMS VICTIM.**

(7) DIRECTOR WINS EXCLUSIVE DISPUTE!

**EL CENTRO.** Aug. 12.—Heat claimed two more victims yesterday—one an unidentified man 45 years old, and the other, William E. Johnson, 25, who was overcome at the Timken ranch, Austin, fell ill at noon and rushed for the summer house. After drinking some water he lay in the shade and shortly thereafter succumbed.

## Financial Interests --- "The Times" Special Monday Page of News and Comment

2 is quartzitic rock; some are aluminumite and ilmenite (brownish). No. 3 is iron carbonate, and iron oxide (microscopic). No. 4 is magnetite (black). There are several kinds of ilmenite and hematite (brownish) in various sizes, some being a hematite variety in red, while the ilmenite is black.

Not Taken.

**LOS ANGELES.** July 31.—Kindly let me know what rocks or minerals are in the sample? Is it used to make paint or brick? Is there any other mineral?

A.: The sample is made up of pebbles; it is grayish brown in color; with the composition hydrous mica. The mineral is white mica. The pyrite makes the brownish form under the microscope.

Nearly 80 per cent of the sample is silicon, with over 25 per cent aluminum; iron, tin, and manganese, 5 per cent, and the potash soluble in water, however.
